Taking on the challenge of carbon neutrality and a circular economy with the concerted strength of the Toyoda Gosei Group

Hiroshi Yasuda

Chief of Carbon Neutrality and
Environment Promotion Division

Global warming, resource depletion due to mass production and disposal, and waste problems have become shared issues worldwide. Under our slogan of “A Greener, Richer World for Our Children,” Toyoda Gosei is accelerating its efforts by bringing together the entire Group to realize carbon neutrality and a circular economy as soon as possible by maximizing its strengths in rubber and plastic polymer technologies in both production and products.

Contributing to Environmental Preservation through All Our Business Activities

Basic Philosophy

The Toyoda Gosei Group formulated its 1st Environmental Action Plan in 1993 based on its Environmental Policy, and since that time has been actively confronting environmental issues. In February 2016, we announced our long-term targets in the TG2050 Environmental Challenge, and have set milestone targets to be reached by 2030. We have also formulated a five-year action plan in which activity items

and targets are set and are carrying out activities to preserve the environment. Globally, we have placed integrated environmental functions in the regions of the Americas, China, ASEAN, and India. The Group is also making efforts as a whole with area control in five global regions, the above four plus Europe/South Africa. These efforts are made in conjunction with government agencies, customers, and suppliers.

Environmental Policy

1. Environmentally-friendly business activities

We are keenly aware that all stages of our business relate deeply to the environment, from development, production, and sales to end-of-life disposal. The Toyoda Gosei Group, including all internal departments, domestic and international affiliates, and suppliers, conducts all business activities with concern for the environment in cooperation and coordination with customers, government authorities, and others.

2. Good corporate citizenship

As a good corporate citizen, we participate in, support, and cooperate with environmental activities by many groups while also working on environmental activities in the community and broader society. We also provide education for all employees to support them in becoming involved in environmental activities as members of the community and society, and support social contributions and volunteerism.

3. While spreading information on these initiatives, we listen to the opinions of people at all levels of society and work to improve our initiatives wherever we can.

TG2050 Environmental Challenge

The Toyoda Gosei Group specializes in the field of rubber and plastic polymers. Our symbol is the benzene ring, a hexagonal hydrocarbon structure that is the starting point for polymers. Borrowing from the six sides of the benzene ring, the TG2050 Environmental Challenge sets six challenges to enhance our environmental efforts with a long-term view to the year 2050. As a roadmap to

achieve that, we have formulated a five-year Environmental Action Plan and are actively working toward its implementation. Furthermore, in August 2023, we announced our decision to accelerate the achieving of carbon neutrality (Scopes 1 and 2) from 2050 to 2030 to enhance our response to climate change issues.
