

8th Environmental Action Plan (2030 targets)

		Range	Target value
CN Carbon neutrality	Scope 1, 2	Global	Carbon neutrality (Greenhouse gas emissions volume)
	Renewable energy	Global	Renewable energy share 100%
	Scope 3 (Category 1)	Global	27.5% reduction (CO ₂ emissions) Compared with FY2019
CE Circular economy	Recycled material usage	Toyoda Gosei	Recycled rubber usage 1,200 t
	Waste	Toyoda Gosei	Industrial waste 18% reduction compared with FY2024 (69% reduction FY2012)
		Overseas affiliates	Industrial waste per sales unit 6% reduction compared with FY2024 (82% reduction FY2015)
	Plastic waste	Toyoda Gosei	6% reduction compared with FY2024
	Logistics	Toyoda Gosei	Promotion of activities to reduce logistics packing materials
NP Nature positivity	Water intake	Global	Water intake per sales unit 6% reduction compared with FY2024
	Water intake High risk locations	Locations judged to have high water intake risk (India, Mexico)	Water intake 6% reduction compared with FY2024
	Water quality High risk locations	Locations judged to have high water quality risk (Japan)	80% of Nitrogen, phosphorus regulatory limits
	Environmental conservation activities	Toyoda Gosei	≥35% green restoration relative of factory area
		Global	Conservation activities Each location ≥1 activity/year
Social contributions in business	Global	Manufacture and supply of products that can contribute to conservation activities utilizing products and technologies
